

## INVASIVE SPECIES

### LOCAL ACTION GROUPS IN WALES

Are you a group or project focused on reducing the risks and impacts associated with **invasive non-native species** in a locality?

If so, consider registering your group as a **Local Action Group (LAG)**

LAGs have proven invaluable in delivering sustainable, long term management of certain species at a local and regional level and raising awareness of the risks and impacts associated with INNS.

The GB Non-native Species Secretariat supports the work of LAGs in a number of ways, including running an annual workshop for LAG staff and volunteers and providing a toolkit of resources to help establish new LAGs and ensure their long term viability.

Local Action Groups come in any shape or size

Register your group to access support

LAGs may cover a county or region, a catchment or a single site

Local Action Group Toolkit available

Share knowledge and ideas
